

'What Works' to improve access to life-changing Assistive Tech (AT) for all

Five years ago we began to test something new. Bringing together key stakeholders and experts working across the AT arena, with the aim of enabling researchers, innovators and AT users to experiment with new ideas.

Join **Global Disability Innovation Hub**, **His Majesty's Government United Kingdom (UK)**, **The World Health Organization** and in partnership with **UNICEF**, **ATscale** and **The International Disability Alliance** for a unique insight into testing and backing new approaches. This session will reflect on learnings from UK aid funded AT2030 programme, led by GDI Hub, to test 'What Works' to improve access to life-changing AT. This is a story of innovation and learning.

COSP 16: Side Event

Tuesday, 13th June
6.30pm to 7.45pm EDT
Conference room 4
(digital stream also available)

As urgency to scale up access grows, could a 'fail fast and scale successes' approach work for AT?

Co-hosted by

#talkAT

This session will be a little different. Big voices from across the Assistive Tech space will share their ideas and visions - a reflection on where we are now and what the future holds.

Do you want to know what really works and what doesn't? Join us and our global partners to find out what's next....

'What Works' to improve access to life-changing Assistive Technology (AT) for all
